Unit 3: Mechanical Advantage and Efficiency

<i>Page Number</i>	Suggested Change
176–177 (full text)	Question 3 should read,
36–37 (module version)	“Look at Figure 4 . Imagine that the volume is the same in both containers before the force is applied. As the force is applied, the volume of the gas will become smaller than the volume of the liquid. Explain why.” The caption of Figure 4 on page 176 (or 36) should read, “When you apply a force to a gas, the gas will compress into a smaller volume.”
